## WHAT IS IT?

**RE-DECK** is a permanent gelcoat based non-skid using our most popular 100 series non-skid patterns. Our sheets are approximately **1/16th to 1/8th of an inch thick**. This sheet can be cut to shape with quality shears or a CNC machine.

This non-skid can be applied using our optional pressure-sensitive adhesive or by using your favorite epoxy for a permanent, true bond.

Use on large and small repair applications.  
Great for customizing a new deck.  
Perfect for prototypes.  
User can color match by spraying with gelcoat or paint.  
Available in sizes 1'x1' to 4'x12'.

## PERMANENT SOLUTION

True bond technology makes **RE-DECK** is an **easy non-skid solution** for deck repair and incorporating a reliable and safe nonskid surface to your existing deck.

Apply gelcoat based **RE-DECK** to any composite surface with epoxy, to create a permanent bond.

This material has the same properties as a molded gelcoat non-skid solution with a professional appearance.
